

True BusinessID Subscriber Agreement

Please read the following agreement carefully. By submitting an enrollment form to obtain a True BusinessID Digital Certificate (the "Certificate") and accepting and using such Certificate, you indicate acceptance of the following terms and conditions and you agree to be bound by them.

This True BusinessID(r) Subscriber Agreement (this "Agreement") is made by and between GeoTrust, Inc. ("GeoTrust") and you, a Certificate applicant, and governs your application for, issuance and use of a Certificate, including Certificates sold through GeoTrust's Enterprise SSL service. By accepting this Agreement, you represent that you have express authority to apply for and accept the Agreement on behalf of either (i) the Subscriber named on the enrollment form, or (ii) an internet service provider, hosting company, or GeoTrust reseller ("Partner") who has express authority from the Subscriber to apply for and accept the Agreement on such Subscriber's behalf. To the extent that Partner performs any obligations on behalf of the Subscriber, the term "Subscriber" shall also apply to Partner. Both the Subscriber and the Partner agree to be bound by the terms of this Agreement.

Subscriber hereby represents that s/he is fully authorized to apply for a Certificate for secure and authenticated electronic transactions. The Subscriber understands that a Digital Certificate serves to identify the Subscriber for the purposes of electronic commerce, and that the management of the Private Key(s) associated with such Digital Certificate(s) is the responsibility of the Subscriber and/or its contractors.

1. Definitions.

"Certification Authority" means an entity which issues Certificates and performs certain functions associated with issuing such Certificates.

"Digital Certificate" means a record that, at a minimum (a) identifies the Certification Authority issuing it, (b) names or otherwise identifies its Subscriber, (c) contains a Public Key that corresponds to a Private Key under the control of the Subscriber, (d) identifies its operational period, and (e) contains a serial number and is Digitally Signed by the issuing Certification Authority.

"Digital Signature" means a transformation of a message using an asymmetric cryptosystem such that a person having the initial message and the signer's Public Key can accurately determine whether the transformation was created using the Private Key that corresponds to the signer's Public Key and whether the message has been altered since the transformation was made.

"Digitally Signed" means the application of a Digital Signature to electronic data.

"Key Pair" means two mathematically related keys, having the following properties: (a) one key can be used to encrypt a message that can only be decrypted using the other key, and (b) even knowing one key, it is computationally infeasible to discover the other key.

"Public Key" means the key of a Key Pair used to verify a Digital Signature. The Public Key is made freely available to anyone who will receive Digitally Signed messages from the holder of the Key Pair. The Public Key is usually provided via a Digital Certificate issued by a Certification Authority. A Public Key is used to verify the Digital Signature of a message purportedly sent by the holder of the corresponding Private Key.

"Private Key" means the key of a Key Pair used to create a Digital Signature. This key must be kept private.

"Subscriber" means a person or entity named in the enrollment form who (a) is the subject named or identified in the Certificate issued to such person or entity, (b) holds a Private Key that corresponds to a Public Key listed in that Certificate, and (c) the person or entity to whom Digitally Signed messages verified by reference to such Certificate are to be attributed.

"Trustworthy System" means computer hardware, software, and procedures that (a) are reasonably secure from intrusion and misuse, (b) provide a reasonable level of availability, reliability, and correct operation, (c) are reasonably suited to performing their intended functions, and (d) adhere to generally accepted security procedures.

2. Subscriber Obligations.
